

# Features Explain The Product, But Outcomes Drive Purchasing Decisions

**KEY INSIGHT** StreamPlay highlights technical capabilities while buyers evaluate business outcomes.

- Messaging focuses on source code, ownership and customization
- Buyers care about speed, growth, profitability and risk reduction
- Current communication forces prospects to translate features into value
- This creates unnecessary friction in the buying process

## FEATURE

## BUSINESS OUTCOME

Source Code

No Vendor Lock-In

White Label

Own Your Brand

Revenue Ownership

Keep More Profit

Multi-Platform Support

Reach More Users

**EXECUTIVE TAKEAWAY** Customers buy outcomes, not features.

# Prospects Are Being Asked To Believe Without Evidence

**KEY INSIGHT** Trust is one of the largest conversion drivers, yet the website provides very little proof.

## CURRENTLY MISSING

- No customer logos
- Limited testimonials
- No case studies
- No measurable proof of performance

Illustrative Trust-Driver Weighting

**EXECUTIVE TAKEAWAY** Trust is demonstrated through proof, not claims.

# The Most Valuable Screen On The Website Is Not Communicating Value

**KEY INSIGHT** The hero section describes the category but fails to communicate business value.

## CURRENT

*“Launch Your Esports Platform”*

## RECOMMENDED

*“Launch Your Gaming Streaming Platform In 21 Days”*

Category Description → Outcome + Timeframe

Generic → Differentiated

**EXECUTIVE TAKEAWAY** The hero section should communicate value within seconds.

# The Demo Journey Creates Friction At The Moment Of Highest Intent

**KEY INSIGHT** The current “Request Demo” experience creates an expectation mismatch with high-intent visitors.

## CURRENT JOURNEY

## RECOMMENDED JOURNEY

**EXECUTIVE TAKEAWAY** High-intent users should experience the product immediately.

# The Website Feels Functional, But Not Market-Leading

**KEY INSIGHT** Repetitive layouts and limited storytelling reduce perceived sophistication and enterprise value.

- Repeated content blocks
- Limited storytelling
- Little visual differentiation
- Brand perception suffers as a result

**EXAMPLE** Apple builds immersive storytelling instead of repetitive feature grids — the standard enterprise buyers now expect.

**EXECUTIVE TAKEAWAY** Website quality directly influences perceived company quality.

# Enterprise Buyers Cannot Properly Assess Platform Risk

**KEY INSIGHT** Critical enterprise purchasing information is largely absent from the website today.

- Limited security information
- Limited infrastructure visibility
- No compliance narrative
- Risk concerns remain unresolved

**EXAMPLE** *AWS provides extensive documentation, compliance detail and architecture transparency.*

Enterprise Readiness — Current vs. Target

**EXECUTIVE TAKEAWAY** Enterprise purchases are driven by risk reduction as much as capability.

# Navigation Limits Self-Service Buyer Evaluation

**KEY INSIGHT** Navigation structure prevents prospects from exploring the platform independently.

## CURRENT

## RECOMMENDED

**EXECUTIVE TAKEAWAY** Modern buyers prefer self-education before speaking with sales.

# High-Impact Conversion Assets Are Missing From The Buying Journey

**KEY INSIGHT** Several high-impact SaaS growth levers are absent from the website today.

- No product demo
- No ROI calculator
- Limited proof points
- Missing technical evaluation tools

HIGHER IMPACT

LOWER IMPACT

**EXECUTIVE TAKEAWAY** Small additions can unlock disproportionate conversion gains.

# StreamPlay's Growth Constraint Is Communication, Not Technology

**KEY INSIGHT** The platform appears capable, but the website does not effectively communicate its value.

## CURRENT STATE

## FUTURE STATE

**The largest opportunity is not rebuilding the product.** It is improving positioning, trust, enterprise readiness and conversion architecture — lifting qualified leads, enterprise sales, brand perception, revenue growth and investor confidence.
